CUMULATIVE EFFECTS ASSESSMENT**

**Table of Contents**

1.0	INTRODUCTION .....	1
2.0	PROJECT IMPACT ASSESSMENT .....	3
3.0	COMPONENTS OF CUMULATIVE EFFECTS ASSESSMENT.....	3
4.0	CEA STEP 1 – IDENTIFYING CUMULATIVE EFFECT ISSUES .....	4
4.1	Potential Affected Resources, Ecosystems, and Human Communities .....	4
4.2	Cumulative Effects Perspective .....	5
4.2.1	Cumulative Effects to Birds.....	5
4.2.1.1	Cumulative Effects to Shorebirds .....	5
4.2.1.2	Cumulative Effects to Waterbirds.....	6
4.2.2	Cumulative Effects to Shellfish .....	7
4.2.3	Cumulative Effects to the Benthic Community .....	8
4.2.4	Cumulative Effects to Sea Turtles .....	8
4.2.5	Cumulative Effects to Seabeach Amaranth .....	9
4.2.6	Cumulative Effects to Submerged Aquatic Vegetation .....	9
4.2.7	Cumulative Effects to Salt Marsh Ecosystems .....	10
4.2.8	Cumulative Effects to Water Quality.....	10
5.0	CEA STEP 2 – GEOGRAPHIC SCOPE.....	10
6.0	CEA STEP 3 – TIMEFRAME FOR ANALYSIS .....	11
7.0	CEA STEP 4- - OTHER ACTIONS AFFECTING THE RESOURCES .....	11
7.1	Inlet Openings.....	11
7.2	Inlet Closures .....	12
7.3	Inlet Navigation Projects.....	13
7.4	Inlet Relocations .....	17
7.5	Beach Nourishment Projects.....	18
7.6	Maintenance Dredging Projects.....	21
7.7	Soft Structure Projects .....	22
7.8	Dredge Disposal Projects.....	23
7.9	Hard Structure Projects.....	24
7.10	Habitat Restoration Projects .....	25
7.11	Other Actions .....	26
7.11.1	Hurricanes .....	26
7.11.2	Population Increase.....	26
7.11.3	Shellfish Harvesting.....	27
7.11.4	Agricultural Pollution .....	28
8.0	CEA STEP 5 – RESOURCES RESPONSE TO CHANGE AND CAPACITY TO WITHSTAND STRESS .....	31
8.1	Effects of Stress on Birds.....	31
8.1.1	Effects of Stress on Shorebirds.....	31
8.1.2	Effects of Stress on Waterbirds.....	32
8.2	Effects of Stress on Shellfish .....	33

### List of Tables

#### Table No.

1.1	Approximate Distance of RFFA Projects in Close Proximity to Project Area.....	1
3.1	Steps in Cumulative Effects Analysis to be Addressed in each Component of the Environmental Impact Assessment (CEQ 1997) .....	4
7.1	Resource Effect Assessment from Past, Present, and Reasonably Foreseeable Future (RFFA) Projects (50 Years) .....	28
7.2	Annual Maintenance Dredging - Bogue Inlet - 1984 to 2002 .....	15
9.1	North Carolina Water Quality Standards (NCDWQ, 2003) .....	45
12.1	Bogue Inlet Projects From Past 50 Years - Past, Present, RFFA .....	48

### List of Appendices

#### Appendix A – Project Area Maps

- Bogue Inlet Project Area
- Bogue Inlet Permit Area
- NCDMF Shellfish Map C004
- Salt Marsh Monitoring Stations

#### Appendix B – Cause and Effect Relationships

- Generic Ecological Cause and Effect for Shorebirds and Waterbirds
- Cause and Effect of Bogue Inlet Project on Shorebirds and Waterbirds
- Generic Ecological Cause and Effect for Shellfish
- Cause and Effect of Bogue Inlet Project on Shellfish
- Generic Ecological Cause and Effect on Benthic Community
- Cause and Effect of Bogue Inlet Project on Benthic Community
- Generic Ecological Cause and Effect for Marine Mammals
- Generic Ecological Cause and Effect for Sea Turtles
- Cause and Effect of Bogue Inlet Project on Sea Turtles
- Generic Ecological Effects for Seabeach Amaranth
- Generic Ecological Cause and Effect for Submerged Aquatic Vegetation
- Generic Ecological Cause and Effect for Salt Marsh Ecosystem
- Generic Ecological Effects for Water Quality
- Cause and Effect of Bogue Inlet Project on Water Quality

## 1.0 INTRODUCTION

This Cumulative Effects/Impact Assessment (CEA/CIA) has been written to support the Bogue Inlet Channel Erosion Response Project Draft Environmental Impact Statement. Refer to Figure 1.1 for the project location. The proposed project will be constructed during the winter months (November 16, 2004 – March 31, 2005) when species migration and spawning is at its lowest. The Bogue Inlet Channel Erosion Response Project considers past, present, and Reasonable Foreseeable Future Actions (RFFA) on a state-wide coastal scale and project vicinity scale from 1965 to 2055. This time period was selected to include the first U.S. Army Corps of Engineers, Wilmington District, beach nourishment projects in 1965 and includes the first Wilmington District placement of dredged material within the project area (in the vicinity of Fort Macon) in about 1979. Projections were extended to 2055, which represents a reasonably foreseeable future because 50 years is the typical planning life of a federal shore protection project. More importance will be placed to those projects that will occur post-construction and in close proximity to the Bogue Inlet Channel Erosion Response Project and Permit Areas.

Table No. 1 lists some of the projects found in closest proximity to the proposed Project Area and are considered to have the potential for significant impacts to resources found in the area. Such projects include Beaufort Inlet Dredging, Carteret County Bogue Banks Beach Restoration Project, Bogue Inlet Maintenance Dredging, and New River Inlet Dredging.

**Table 1.1**  
**Approximate Distance of RFFA Projects in Close Proximity to Project Area**

Project	Approximate Occurrence of Project	Approximate Distance to Project Area
Beaufort Inlet Dredging	Unknown	30 miles to the north
Carteret County Bogue Banks Beach Restoration Project	2008-2010	0 miles
Bogue Inlet Maintenance Dredging	2006	0 miles
New River Inlet Dredging	Sporadic occurrence, may occur in next couple of years	20 miles to the south
