

BALD HEAD ISLAND SETTLEMENT MONITORING SURVEYS
REPORT 6
JANUARY 2006

Introduction

The 6th set of monitoring surveys for the Settlement Agreement between the Village of Bald Head Island and the United States Army Corps of Engineers was taken in January 2006. The criteria to be used in examining the surveys is to be a continuous passage through Smith Island Channel, Baldhead Shoal Channel Reach 1 and Baldhead Shoal Channel Reach 2 with a minimum bottom width of 500 feet at a depth of -42 feet mean lower low water (mllw).

Data

The 5th set of monitoring surveys taken in November 2005 is displayed in Figure 1 and is labeled November 2005 Surveys. Figure 2 is a plot of surveys taken in January 2006 and Figure 3 is a difference plot between the November and January surveys.

A plot for Smith Island Channel of the navigable widths at a depth of -42 feet mllw (navigable depth) is shown in Figures 4 and 5. MLLW is 2 inches lower than mlw at Bald Head Island. A plot of the minimum channel cross section at stations 5+00, 23+00, and 26+00 are shown in Figures 6, 7, and 8. The baselines for the cross section plots are shown in Figure 1.

A plot for Baldhead Shoal Channel Reach 1 of the navigable widths at a depth of -42 feet mllw is contained in Figures 9 and 10. Plots of the minimum channel cross sections in the vicinity of the spit at stations 20+00 and 21+00 are shown in Figures 11 and 12.

A plot for Baldhead Shoal Channel Reach 2 of the navigable widths at a depth of -42 feet mllw is contained in Figures 13 and 14. A plot of the minimum channel cross sections at stations 45+00 is shown in Figure 15.

Conclusion

The minimum navigable width at a depth of -42 feet mllw exceeds 500 feet in all three channels.
