

Contributing factors for allowing Properties Owners to perform Erosion Control--Rip Rap

1. Properties on Main Channel of Lake
2. If the boundary line is 100 feet or less from the bank erosion
3. If erosion is more than 100 feet from the boundary line and the permit holder has a permitted Vehicle Access Trail or if there is no obstructing vegetation between boundary line and project
4. Erosion threatens property line

Criteria for Allowing Rip Rap

1. Bank at shoreline has eroded 3 feet or higher
2. Property is on the main channel or has a very steep bank
3. Wave action, minimal runoff from private property
4. Stabilization will minimize silt deposition problem into the reservoir
4. Minimal trees will be removed to perform work (xx per acre per project)
5. Trees will be replanted on 25 x 25 spacing in disturbed area
6. Property Owner must guarantee survival of sod or grass mixture for five years and replanted trees must be guaranteed for five years.
7. If bank has no natural rock already in place.
