

US Army Corps
of Engineers
Wilmington District

AIWW – Wilmington District (Navigation) (O&M)

- Continued interest from Atlantic Intracoastal Waterway Association (AIWA)
- FY 2022 Maintenance dredging contract is ongoing.
- FY 2022 IJJA funds will be used for maintenance dredging and placement site evaluations.
- Maintenance dredging contract planned for FY 2023

CONGRESSIONAL DISTRICT: NC 3, 7

DATE: 01 APRIL 2022

1. **AUTHORIZATION:** River and Harbor Acts of 1912, 1927, and 1937, as amended.
2. **LOCATION AND DESCRIPTION:** The project is located on the east coast of the United States, between Norfolk, Virginia and the St. Johns River, Florida. The section within the Wilmington District begins at the Virginia-North Carolina state line and extends generally southerly and southwestwardly to North Carolina-South Carolina state line, a total of 308 channel miles. The authorized project consists of a waterway, 12 feet deep, with varying widths of 90 to 300 feet.
3. **FY 2021 FEDERAL FUNDING ALLOCATION:** \$3,625,000
4. **FY 2022 PRESIDENT'S BUDGET:** \$5,950,000. Final Bill: \$5,950,000. Funds are being used to perform hydrographic surveys, real estate, environmental monitoring, and maintenance dredging located within the high commercial use segment (approximately 2 million tons) in support of navigation commerce emanating to/from Morehead City Harbor and critical inlet crossings to ensure safe transit of commercial cargo. Infrastructure Investment and Jobs Act (IJJA) funds in the amount of \$4,552,000 are being used for additional maintenance dredging (\$4,052,000) and for evaluations of upland placement sites (\$500,000).
5. **FY 2022 WORK PLAN:** TBD.
6. **FY 2023 PRESIDENT'S BUDGET:** \$15,955,000. These funds will be used to perform hydrographic surveys, real estate, environmental monitoring, and award of a maintenance dredging contract located within the high commercial use segment (approximately 2 million tons) of the

PROJECT INFORMATION - AIWW - Wilmington District (Navigation) (O&M) – Continued

project. Funds in the amount of \$14,390,000 could be used to perform the following channel maintenance dredging:

Government Plant Mooring Clusters and Dock repairs	\$250,000
Placement area maintenance contract between Norfolk, VA and Beaufort, NC	\$3,250,000
Maintenance dredging contract of additional channels between Morehead City and Little River, SC	\$5,070,000
Maintenance dredging contract of additional channels between Morehead City and Norfolk, VA	\$2,570,000
Placement area maintenance contract between Beaufort, NC and Little River, SC	\$3,250,000
Total	\$14,390,000

7. **ISSUE AND/OR STATUS:** Results of the (January 2007) AIWW Report to the North Carolina (NC) Sea Grant, NC Department of Environment and Natural Resources and NC Beach, Inlet & Waterway Association indicates that if the AIWW is allowed to continue to shoal, state-wide economic output will decline by \$109 million per year; job losses will be 1,700 per year; wages and salaries will decrease \$52 million per year; Federal tax revenue will decrease by \$14.5 million per year; and local tax revenue will decrease by \$8.8 million per year.

The users of the AIWW, which are adversely impacted by lack of channel maintenance, include:

- US Coast Guard search and rescue operations
- Barge traffic supporting intermodal transportation to deep draft ports
- Military equipment and supply transportation barges and vessels (DOD)
- Commercial fishing vessels
- Recreational vessels
- National Oceanic and Atmospheric Administration vessels (NOAA)
- US Army Corps of Engineers dredging vessels
- Industry dredging vessels

Two major industries in North Carolina, Nucor Steel and PCS Phosphate, use the AIWW to ship raw materials and finished products to and from the state port at Morehead City. Draft restrictions and possible channel closures between these facilities continue to greatly impact the viability of these industries.

Without the utilization of the waterway, seafood could only be landed at Oregon Inlet, Morehead City and Wilmington. Other sites in the state, serving the seafood industry, would be closed contributing to tremendous economic losses to the state.

8. **OTHER INFORMATION:** None.
