Future Work: There are a number of projects/tasks currently under development for future construction including the following: berm design, rail recapitalization, firefighting water improvements (phase 1 design and construction), pad upgrades, a second task order (GPR mainline repairs) under the railroad repair Single Award Task Order Contract (SATOC), repair East Boiling Springs Road culvert, annual pavement repairs (N Wharf), annual roof repair (Bldg 26), repair to mission essential building 279, building 26 HVAC repair and building 32 roof repair. The FY 2022 program is expected to be approximately \$24,000,000 in contract cost. Additionally, USACE, Wilmington District, is currently executing two SATOCs, the MOTSU SATOC for Sustainment, Restoration, and Modernization tasks and Railroad Repair SATOC, for correcting deficiencies outlined in the 2020 USACE Engineering Research and Development Center Report.

Other MOTSU Support Work: USACE, Wilmington District, also continues to support MOTSU in a variety of Environmental Compliance, Master Planning, and Monitoring activities. This includes but is not limited to Master Plan Updates, Cultural Resource Management Plan Updates, Spill Contingency Plan Updates, Forestry Management Plans, Botanical Surveys, and Red-Cockaded Woodpecker monitoring. Additionally, USACE, Wilmington District, maintains a base maintenance contract for MOTSU that allows repair needs to be quickly completed.
