

## U.S. Army Corps of Engineers Contractor “OpenGround” Cloud Introduction

**What:** USACE is migrating away from the “gINT” borehole geotechnical software package to a new program called “OpenGround,” which is part of the “Keynetics” data management application system. If you would like to learn more about “OpenGround,” you may attend an upcoming online webinar hosted by Mr. Scott Deaton of Dataforensics. Mr. Deaton will be providing a broad overview of “OpenGround,” along with information about contractor access to the software.

**When:** 22 September 2021 (1300 – 1400 hrs EDT)

**Webinar Information:** <https://global.gotomeeting.com/join/937755397>

**Dial-in Information:** (US): +1 (571) 317-3112

Access Code: 937-755-397
